KNX TRAINING KIT "BASIC"
for KNX TRAINING CENTRES

The practical case contains all the devices needed for certified KNX Basic Trainings in the KNX Training Centre:

- Power supply and IP router with Ethernet cable
- Multifunctional switching/shutter actuator with red/green indicator LEDs (up/down, on/off)
- Dimming actuator with lamp
- Wireless blind actuator with red/green indicator LEDs (up/down)
- KNX TP/RF media coupler
- Bus push-button for switching, dimming (relative) and for drive control

Additionally included in the training kit are:

- Radio USB stick for KNX RF setup
- Mains cable for the case
  with plug type E+F (CEE 7/7)
  and adaptor for D (BS 546, 5 A) and G (BS 1363)

The case can be locked and transported safely and comfortably thanks to the telescopic handle and wheels.
