Confirmation of compliance with the EU Packaging Regulation (EU) 2025/40 (PPWR)

Dear Sir or Madam,

Regulation (EU) 2025/40 on packaging and packaging waste (PPWR) applies from 12 August 2026. As a producer within the meaning of this Regulation – that is, the company that first makes the packaged products available on the Union market – we hereby confirm that we have assessed the requirements applicable to our product packaging and prepared the necessary documentation.

In detail:

- Technical documentation in accordance with Annex VII PPWR is available for our packaging. It is structured by packaging family – by packaging type, material and supplier – and demonstrates compliance with Articles 5 to 12 for each family.
- On this basis we have issued EU declarations of conformity in accordance with Article 39 in conjunction with Annex VIII PPWR. Each declaration bears a unique identification number and is signed by the management.
- The information is based on declarations and data sheets provided by our packaging suppliers as well as on our own assessments as producer.
- Both documents are retained for the statutory period – five years for single-use packaging, ten years for reusable packaging.

Requirements applying at later dates

The PPWR provides for requirements that only take effect later – harmonised labelling from August 2028 as well as provisions on recyclability, minimum recycled content and empty space ratio from January 2030. Some of these are still to be specified by delegated acts. This confirmation refers to the obligations applicable from the date of application on 12 August 2026; we will implement the subsequent stages within the prescribed deadlines.

Provision of documents

As our trading partner, you will receive the EU declarations of conformity for the articles you purchase from us. The declaration is drawn up for a specific packaging or article; the Regulation does not provide for a blanket declaration covering an entire product range. Please therefore let us know the relevant article numbers.

The technical documentation in accordance with Annex VII contains supplier- and production-related information; it is not distributed generally, but submitted to the market surveillance authorities on request.

Please do not hesitate to contact us if you have any questions.

Yours faithfully

Lina Elsner
Managing Partner
